PROFILE SUMMARY

I enjoy software development of any kind although I do prefer strong typed languages. I aspire to broaden my spectrum of knowledge as much as possible. I work well with teams and excel in my personal skills and language knowledge.

WORK EXPERIENCE

Jan 2022 (8 months)

Ericsson (Athlone)

3rd year work placement with the same team as previous summer. This was excellent as I was quickly able to start helping and could further expand my knowledge.

- Applied and expanded previously learned skills
- Developed automated test suites
- Worked towards automating testing and integration
- Further learned more about containerisation and orchestration

Jun 2021 (3 months)

Ericsson (Athlone)

First software work experience that I luckily got into after my 2nd year of study. I was part of DevOps team and had to pick up many new skills.

- Gained proper work experience in industry
- Worked outside of my comfort zone (of programming)
- Had to rapidly learned about Docker and Kubernetes

EDUCATION

Aug 2019 – Aug 2023

Technological University of the Shannon: Midlands Midwest:

BSc (Hons) degree in Software Design (Cloud Computing)

Successfully aiming for 1.1 Honours Degree

2010 – 2015

ST. Clare's College, Ballyjamesduff, Co. Cavan

Leaving Certificate all honours with 425 points.
